

MDT Awarded NACUSO's CUSO of the Year Runner Up

MDT was recognized for commitment to innovation and collaboration

April 17, 2019

We are proud to announce that Member Driven Technologies has been named runner up for NACUSO's 2019 CUSO of the Year Award.

The annual award recognizes CUSOs who exhibit excellence and innovation in utilizing the collaborative model to bring new solutions to the credit union industry. The CUSOs are judged on criteria such as their ability to:

- Bring value to the industry, their owners and credit union members
- Exemplify thought leadership and critical thinking
- Demonstrate innovation in the design, implementation and execution of business processes
- Create value through collaboration and innovation in organizational design
- Show results, outcomes and performance

For only the second time in the history of the award, a runner up has been selected. Speaking for NACUSO, Jack Antonini, President and CEO of the organization, said the evaluation and rating between winner Member Access Processing (maprocessing.com) and MDT was so close that naming a runner up was again appropriate. The NACUSO decision-makers felt that MDT has a unique understanding of its clients and the daily demands and challenges they face, and we have always been an advocate of wider industry collaboration. They went on to comment on our two annual events for credit union clients and partner technology vendors to have strategic discussions on industry trends and business challenges. In addition, they mentioned that MDT is also involved in larger industry initiatives such as Sheltered Harbor, which supports credit unions in the event of a major cyber incident.

Larry commented on MDT's being named runner up: "Our goal at MDT is to be more than just a technology provider to our clients; we want to be a trusted partner they can lean on for strategic guidance and support in the good times and bad. We are honored to be recognized by NACUSO for our commitment to bettering the credit union industry and encouraging our clients to be innovators and reach their full potential."

CTO Matt Baaki accepted our award on April 16th at NACUSO's Network Conference in San Diego, California.

About Member Driven Technologies (MDT)

MDT provides credit unions with a secure, private cloud alternative for core banking and IT needs. The CUSO's service-first, hybrid approach to outsourcing enables credit unions to gain efficiency and reduce costs while maintaining a high level of control. MDT hosts the Symitar Episys® core platform, along with seamlessly integrated solutions to run the entire institution, including digital banking, payments, lending, security, continuity and regulatory services. MDT serves credit unions representing more than \$22 billion in assets and approximately two million members.
